

Partnering with Existing Programs that Target Specific Communities and Populations

The Service Planning Areas (SPAs) of Los Angeles County provide public health services and work in partnership with communities to promote optimal health and well being for the area's residents.

Activities they participate in include:

- * Developing and producing target community needs assessments;
- * Developing guidelines for health promotion and education activities;
- * Providing consultation and technical assistance to other county professionals, health advocates and community based organizations, and local school districts on program planning of health promotion and education activities.

Find out more about how to partner with SPAs by directly contacting the area health offices:
